

Atal Mission for Rejuvenation and Urban Transformation

Bhadrak

As per the 2011 census, the population of Bhadrak Municipal Corporation is 1.07 Lakh. The decadal growth rate of the city is @ 16.16%. The average floating population is about 10,000. Both horizontal and vertical growth of the city is observed during the recent years. The city has grown along the both sides of the Salandi river. The central part of the city is high density zone with major land use under residential and commercial activities.

Bhadrak is primarily centre of agriculture, trade and commerce activities with few industrial units. The Municipality areas do not have many industrial units excluding some small scale and HH industries along NH5 and SH9. There are few rice mills and pulse mills with in municipal unit along NH5.

After the construction of railway line from Howrah to Madras, the town developed as an important transport node for the surrounding region. The transport gained momentum with the construction of SH9 and Number of Major District roads. Due to its

location in the core of cyclonic tract in the Bay of Bengal and causing natural hazards in the costal tract, its growth could not sustain and town remained static till the turn of the Century.
